

INDUSTRY TALK WEBINAR AIRASIA

Introduction

This poster highlights key takeaways from a career talk by AirAsia on its transformation into a digital ecosystem and how ICT drives innovation. The session shared insights into AirAsia's tech culture, remote work practices, and career opportunities in software engineering and data. It also showed how ICT professionals play an important role in supporting and shaping modern industries.

AirAsia has grown from a low-cost airline into a wider digital platform that offers travel, delivery, and financial services. The career talk explained how ICT plays a key role in supporting this transformation and the types of tech roles needed to keep it running. It also encouraged students to explore careers in software engineering, cloud infrastructure, data, and digital innovation.

Content of the talk

• AirAsia's Digital Transformation

AirAsia now operates across three pillars:

- Travel (flights, hotels, lifestyle services)
- Delivery (food, groceries, beauty, transport)
- Fintech (banking, insurance, rewards)

• ICT Roles & Engineering Culture

- AirAsia practices a flat hierarchy with a "No Sir" culture, encouraging open communication and teamwork.
- The engineering teams follow Agile development to deliver features faster and adapt to changes efficiently.
- Career roles include Frontend and Backend Development, DevOps/SRE, Data-related roles, and Business Analysis.

• Working From Home (WFH) Reality

- The session emphasized the importance of professionalism, discipline, and strong communication in the workplace.
- It also highlighted that remote work still requires clear structure, healthy boundaries, and good teamwork to stay productive and aligned.

• Internship & Career Pathways

- AirAsia offers internship intakes in multiple cohorts throughout the year (Q1, Q3, and Q4).
- The session also introduced the GUTOP program, which provides internship opportunities for international students.

Reflection

This career talk helped me realize that ICT is more than just coding it is about building systems that support entire business ecosystems. AirAsia's transformation showed me how technology drives innovation, efficiency, and better customer experiences across industries. I also learned that ICT roles are meaningful because they directly support business growth, global connectivity, and digital transformation, which motivated me to develop my skills and become a stronger problem-solver.
